The image shows a 'Field Properties' dialog box with four tabs: 'General', 'Events', 'Content', and 'Totals'. The 'General' tab is selected. It contains the following fields and options:

- Field Name:** A text box containing 'Facility_Name'.
- Alignment:** A dropdown menu set to 'left'.
- Word Wrap:** An unchecked checkbox.
- Output for each row:** A checked checkbox.
- Output for each column:** An unchecked checkbox.
- Font:** A text box displaying 'Times New Roman, 10'.
- Change...:** A button next to the font text box.

At the bottom of the dialog are 'OK' and 'Cancel' buttons.

The screenshot shows a Windows-style dialog box titled "New Group Wizard". Inside, the section "Column and Row keys" is active, with the instruction "Specify fields for column and row keys". The dialog is divided into three main areas: "Fields for use in cells:" on the left, "Column key fields:" on the top right, and "Row key fields:" on the bottom right. The "Fields for use in cells:" list contains "UnitPrice". The "Column key fields:" list contains "EmployeeID" and "FullName". The "Row key fields:" list contains "ProductID" and "ProductName". Between the lists are arrows for moving fields: a right arrow between "Fields for use in cells:" and "Column key fields:", a left arrow between "Fields for use in cells:" and "Row key fields:", and right and left arrows between "Column key fields:" and "Row key fields:". At the bottom are buttons for "< Back", "Next >", and "Cancel".

Two queries (Master-Detail) for PivotTable

You can represent two related master-detail queries as a PivotTable. One query determines a set of rows, and another query determines a set of columns. If master is a set of rows, detail query will be output in cells from left to right. If master is a set of columns, details will be output from top to bottom. You should also specify a key for detail query.

Fields for Detail Key.

Select a fields for detail vector key. Rest of fields are for use in cells of the PivotTable.

Select a fields for Column key. For each Column key field values are unique. Rest of fields are for use in cells of the PivotTable.

Fields for use in cells:

- High Limit
- Internal High Limit
- Internal Low Limit
- Level 3
- Low Limit
- Maximum
- Minimum
- Name
- Non-Applicable Date
- Period Frequency
- Period Time
- Roll Period Frequency
- Roll Period Time
- Template Agency
- Template Authority

Column key fields:

- Applicable Date
- Calculation Begin Date
- Calculation Definition
- Calculation Description
- Calculation End Date
- Comparison
- Compliance Statement
- Cumulative Period Frequency
- Cumulative Period Time
- Data Collection Frequency
- Data Collection Periodicity
- Data Determination Method
- Date Created
- Description
